Before You Begin...

This item is equipped with a rechargeable battery that is charged via the solar panel's exposure to direct sunlight. The lights must be charged for 6-8 hours before use. The battery will power the lights for 3-5 hours. The duration of light will depend on how much the battery was able to charge, which can be affected by geographical location, weather, conditions, and time of day.

This product has an Ingress Protection rating of IP44. This means that it is protected against water splashes. The product is NOT protected from submersion in water, such as flooding.

Setting Up

Place or install in a location where the solar panel will receive 6-8 hours of sunlight per day. Choose a location that is far away from other strong light sources, such as street lights, as this could prevent the solar lights from being able to power on.

Remove the protective film (if any) from the solar panel.

Using the Light

Make sure the light is charged up.

- Move the **[Power]** switch on the bottom of the solar panel battery box to power the spotlight ON. The solar panel must be in the dark for the lights to turn on.
- Move the **[Power]** switch to the middle "PIR" position to turn the spotlight on in motion activation mode.
- Move the **[Power]** switch to the OFF position to turn the spotlight OFF.

Keep the solar panel clean, using a damp cloth to remove excess dirt or dust.

WARNING Li-ion Battery Inside

This product is fitted with an Li-ion battery. Do not damage, open, or dismantle the battery and do not submerge or use in corrosive conditions. Never dispose of batteries in a fire, and never expose them to high temperatures. Do not expose the product to temperatures exceeding 60°C (140°F).

The crossed-out garbage bin symbol means that you must not dispose of this product together with unsorted household waste.
