# Windows 10 S Mode

## Switching out of S mode

To increase security and performance, Windows 10 in S mode runs only apps from the Microsoft Store. If you want to install an app that isn't available in the Microsoft Store, you'll need to permanently switch out of S mode. There's no charge to switch out of S mode, but you won't be able to turn it back on. To switch out of S mode follow the steps below .

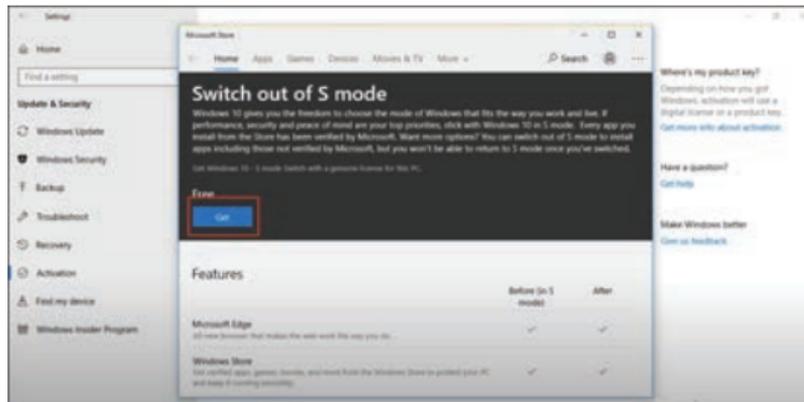

1. On your PC running Windows 10 in S mode, open Settings > Update & Security > Activation.

2. Find the "Switch to Windows 10 Home" or "Switch to Windows 10 Pro" section, then select "Go to the Store."

Note: Don't select the link under "Upgrade your edition of Windows". That's a different process that will keep you in S mode.

3. On the page that appears in the Microsoft Store (Switch out of S mode or a similar page), select "Get." After you confirm this action, you'll be able to install apps from outside the Microsoft Store.
