### Getting Started

**Clay Mask Cold Therapy**  
Place the mask in a clean, sealed bag (*not included*) and place in a refrigerator or freezer for at least 2 hours, or until desired temperature is achieved.

Always check to make sure the temperature of the mask is suitable before applying directly to the face. Initially place the fabric side onto the face. Switch to the PVC side if this is not cold enough.

**Clay Mask Heat Therapy**  
**WARNING: DO NOT MICROWAVE OR HEAT THE MAGNET MASK!**

1. Remove the magnet mask from the clay mask. Wrap the clay mask in a moist cloth or paper towel, and place in the center of a clean microwave turntable. Make sure any additional microwave features such as "browning" are turned off.
2. Check the chart below, and microwave for the correct amount of time. *Carefully check the heat level of the mask with your hand to make sure it's not too hot before placing on the face.*

Microwave Power Rating	Heating Time From Room Temperature	Additional Heating Time
800 Watts	30 Seconds	10 Seconds
1000 Watts	20 Seconds	5 Seconds

3. If a hotter temperature is desired, reheat for the appropriate Additional Heating Time indicated above in intervals, checking each time. Knead the mask to make sure temperature is distributed evenly. Rotate the mask 180° before returning to the microwave.

**Safety Note:** Apply to the affected area for no more than 15 minutes at a time, with 15-minute breaks in between applications.
